Content Summary

This dataset appears to contain All-India Consumer Price Index (CPI) data, grouped by categories such as food and beverages, clothing, housing, fuel and light, household goods and services, health, transport and communication, recreation and amusement, education, personal care and effects, and miscellaneous. The data includes weights, indices for November 24th and December 24th of each year (with some provisional values), and a general index for all groups and consumer food price index.
